Chapter 1

Examples

Here is the introduction. The next chapter is chapter 2.
a new paragraph

1.1 How Does Sections, Subsections, and Subsections Look?

Well, like this

1.1.1 This is a Subsection

and this

This is a Subsubsection

and this.

A Paragraph You can also use paragraph titles which look like this.

A Subparagraph Moreover, you can also use subparagraph titles which look like this. They have a small indentation as opposed to the paragraph titles.

I think that a summary of this exciting chapter should be added.

Is it possible to add a subsubparagraph?

1.2 An Example of an Example

You can also have examples in your document such as in example 1.1.

Example 1.1 (An Example of an Example)
Here is an example with some math

$$0 = \exp(i\pi) + 1\,. \tag{1.1}$$

You can adjust the colour and the line width in the `macros.tex` file.

1.3 Bullets

LaTeX offers a wide range of bullets from points to numbers.

- This is Bullet points in LaTeX
- This is Bullet points in LaTeX

1.6 Listings

The next code will be directly imported from a file:

```
4  def tokenize(text):
5      'Accept a string, return list of words without punctuation or stopwords'
6
7      # lowercase everything
8      text = text.lower()
9
10     # remove punctuation (\W matches any non-alphanumeric character)
11     text = re.sub("\W", " ", text)
12
13     # return list of words, without stopwords
14     droplist = stopwords.words('english')
15
16     return [word for word in text.split() if word not in droplist]
```
